Professional Services Scheule

SERDI Corporate Overview

SERDI, LLC is a woman-owned small business founded in 2003 by a group of Information Technology experts, SERDI provides superior engineering and professional services to the Federal Government, Defense Contractors, and commercial industry.

SERDI offers comprehensive Cyber Security and Information Technology Engineering Services. Our full suite of services includes strategic planning and business processes, development, training, and program management-providing expert advice on substantive and methodological issues. In addition, SERDI offers complete Information Assurance (IA) services including Authorization & Accreditation (C&A), security audits, FISMA compliance, and much more. Our approach to cyber security helps the government minimize risk through a sustained security program that protects the integrity, confidentiality, and availability of critical systems and data. Information security is an ever-present challenge; and our information assurance experts have helped Federal agencies, State agencies, and commercial clients to secure their enterprise operations while enabling information sharing. Risks can arise from inadequate business processes and procedures, failures in policy and regulatory compliance, audit reports, issues associated with Internet and extranet connectivity, employee misconduct, corporate espionage, and unforeseen business interruptions.

Prime Vehicles: GSA STARS II 8a, GSA IT Schedule 70, GSA PSS (Formal Known as MOBIS), FAA eFAST

Clients: Army, DoS, IRS, FHFA, USDA NRCS, USDA OCIO, USDA, OPPI, FAA, National Guard & DHS

SERDI Principles

Business Re-Engineering: To provide clients with solutions crafted to meet their specific challenges and enable them to profit from the advanced use of technology and business processes.

Business Results: Achieving sustained growth and profitability for the benefit of all stakeholders in the business through a “get it right the first time” approach and by always striving to beat our prior performance, using our metric-based system.

Cost Effective: Meeting customer needs in a cost-effective manner and supporting them with ongoing training and best practices to deliver business solutions.
