SERDI awarded FAA e-FAST Contract

August 2011 — SERDI announces the award of a Master Ordering Agreement (MOA) for the Electronic FAA Accelerated and Simplified Tasks (e-FAST) program. Under this MOA, SERDI is eligible to provide ISO 9001:2008 backed software engineering, systems engineering and systems integration services for the next 7 years. With a \$2B ceiling the e-FAST contract, FAA's preferred acquisition vehicle for fulfilling its Small Business goals. SERDI was awarded a BPA to perform services in 3 functional areas:

- ◆ Business Administration & Management (BAM)
- ◆ Engineering Services (ES)
- ◆ Computer/Information Systems Development

The FAA developed eFAST in order to support its operations to streamline procurement processes. eFAST offers a broad range of comprehensive professional and support services and solutions consisting of engineering, research and development, information technology, emerging technologies, financial, and management services. This is the first generation of the eFAST program, and has a base period of 5 years through September 30, 2014, with 2 options of one year each.

SERDI recognizes the critical role the FAA plays in improving the safety and efficiency of air travel throughout the United States and abroad" said Sabrina Poole, President and CEO of SERDI. Sabrina added, "This contract provides an avenue for SERDI to bring its ISO 9001:2008 systems engineering processes and exceptional employees to bear in assisting FAA solve its complex mission support challenge.

SERDI is elated to receive this award and we are excited about the potential that eFAST offers for us to support FAA critical mission systems. Just as we have helped other government customers meet their mission support objectives, SERDI looks forward to making an impact at the FAA, assisting with solutions to the demands of the 21st century."
